NOME _____

DATA _____

Busy bees

Bees are small insects with six legs and four wings. They live together in a hive. In a hive there is one queen, thousands of worker bees and some male bees, called drones.

Worker bees are very busy. They fly from flower to flower and collect nectar and pollen. With the nectar they make honey. When a bee flies from one flower to another, it carries pollen and helps the plants to make fruit and seeds.

Without bees, we wouldn't have many fruits and vegetables. That's why it is important to protect them!

Words **hive** = alveare **worker bees** = api operaie **seeds** = semi **protect** = proteggere

1 True or false? Cerchia T o F.

1 Bees have got eight legs. T F

2 There is one queen in a hive. T F

3 Bees make honey with nectar. T F

4 Bees are not important for plants. T F

2 Answer the questions.

1 What are male bees called?

_____

2 How do bees help plants?

_____
