Calcola perimetro e area

MATEMATICA | 4ª E 5ª

Rettangolo: P = (b + h) × 2, A = b × h. Quadrato: P = l × 4, A = l × l. Triangolo: A = b × h : 2. Le figure non sono in scala.

NOME _____

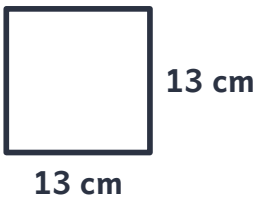

DATA _____

Rettangolo

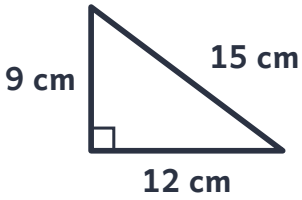

P = _____ cm A = _____ cm²

Quadrato

P = _____ cm A = _____ cm²

Triangolo rettangolo

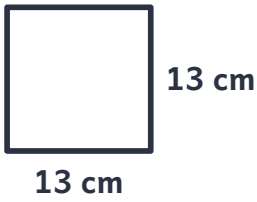

P = _____ cm A = _____ cm²

Rettangolo

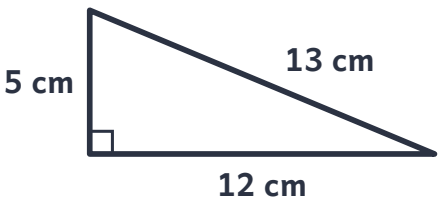

P = _____ cm A = _____ cm²

Quadrato

P = _____ cm A = _____ cm²

Triangolo rettangolo

P = _____ cm A = _____ cm²

Calcola perimetro e area

SOLUZIONI

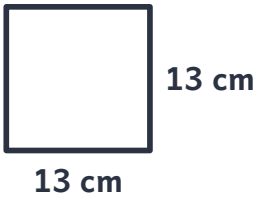

Rettangolo

P = (12 + 6) × 2 = 36 cm
A = 12 × 6 = 72 cm²

P = 36 cm A = 72 cm²

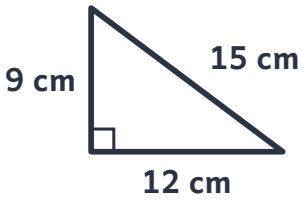

Quadrato

P = 13 × 4 = 52 cm
A = 13 × 13 = 169 cm²

P = 52 cm A = 169 cm²

Triangolo rettangolo

P = 9 + 12 + 15 = 36 cm
A = 12 × 9 : 2 = 54 cm²

P = 36 cm A = 54 cm²

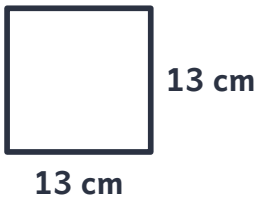

Rettangolo

P = (10 + 3) × 2 = 26 cm
A = 10 × 3 = 30 cm²

P = 26 cm A = 30 cm²

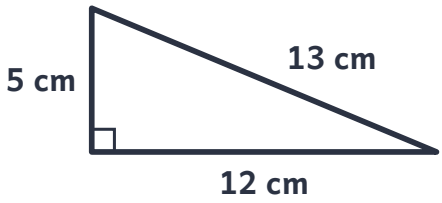

Quadrato

P = 13 × 4 = 52 cm
A = 13 × 13 = 169 cm²

P = 52 cm A = 169 cm²

Triangolo rettangolo

P = 5 + 12 + 13 = 30 cm
A = 12 × 5 : 2 = 30 cm²

P = 30 cm A = 30 cm²
