Calcola perimetro e area

MATEMATICA | 4ª E 5ª

NOME _____

DATA _____

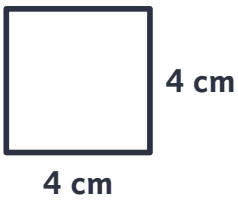

Rettangolo: P = (b + h) × 2, A = b × h. Quadrato: P = l × 4, A = l × l. Triangolo: A = b × h : 2. Le figure non sono in scala.

Rettangolo

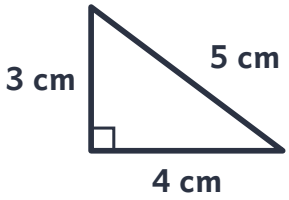

P = _____ cm A = _____ cm²

Quadrato

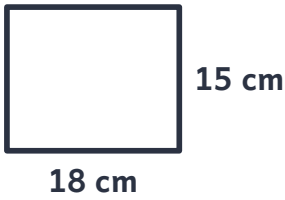

P = _____ cm A = _____ cm²

Triangolo rettangolo

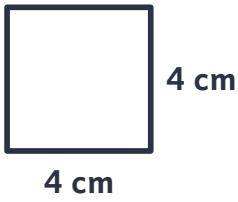

P = _____ cm A = _____ cm²

Rettangolo

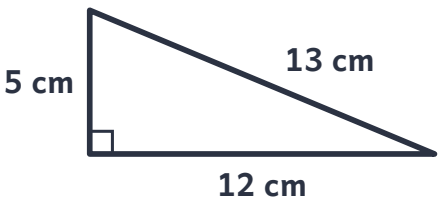

P = _____ cm A = _____ cm²

Quadrato

P = _____ cm A = _____ cm²

Triangolo rettangolo

P = _____ cm A = _____ cm²

Calcola perimetro e area

SOLUZIONI

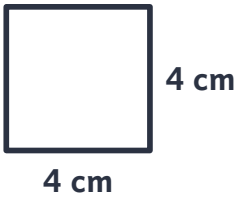

Rettangolo

P = (18 + 6) × 2 = 48 cm
A = 18 × 6 = 108 cm²

P = 48 cm A = 108 cm²

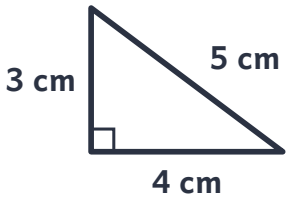

Quadrato

P = 4 × 4 = 16 cm
A = 4 × 4 = 16 cm²

P = 16 cm A = 16 cm²

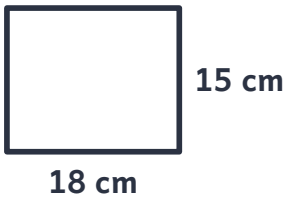

Triangolo rettangolo

P = 3 + 4 + 5 = 12 cm
A = 4 × 3 : 2 = 6 cm²

P = 12 cm A = 6 cm²

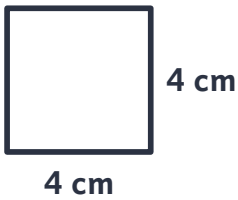

Rettangolo

P = (18 + 15) × 2 = 66 cm
A = 18 × 15 = 270 cm²

P = 66 cm A = 270 cm²

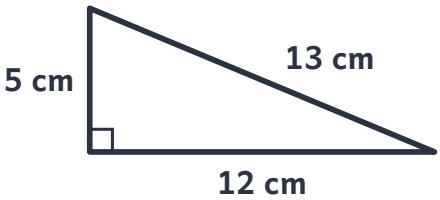

Quadrato

P = 4 × 4 = 16 cm
A = 4 × 4 = 16 cm²

P = 16 cm A = 16 cm²

Triangolo rettangolo

P = 5 + 12 + 13 = 30 cm
A = 12 × 5 : 2 = 30 cm²

P = 30 cm A = 30 cm²
